Title : Foundation blocks – Specifications

Scope : 1.1 This standard is for solid foundation and basement wall units (hereinafter - blocks), which are manufactured from normal and lightweight concrete conforming to LST EN 206-1 and LST 1974 requirements.
2.1 The blocks are used in the construction of buildings and underground basement walls. Blocks can be used for installation of foundation pad as well as for installing foundations in wet soils where the environment is non-aggressive. Under the latter conditions waterproof insulation shall be installed. When blocks are used in hostile environments, the requirements of LST EN 206-1 5.3 and of LST EN 13369 4.3.7 must be taken into account.

Scope : 1.3 In terms of flammability blocks classified as "A" class do not necessitate to further test in accordance with LST EN 13369 4.3.4.
1.4 Detailed production drawings are to be prepared in accordance with applicable regulatory documents.

Title : Acceptance testing of gamma cameras
Scope : This ÖNORM is both the basis for the legally required acceptance testing and the basis for the review of its supply agreement with the manufacturer. Since the determination of all parameters specified by NEMA is an extremely time-consuming task, in this ÖNORM a subset of measurements is defined that which can help in identifying significant problems. The purpose of this ÖNORM is to check the significant points provided by the manufacturer's specification in an abbreviated procedure. It is therefore essential for selected test positions, which are achieved with meaningful test equipment, carried out acceptance tests. If necessary, the tests according to NEMA are replaced by simplified custom procedures. Reference values specifying tolerance values for the following consistency checks are set to ensure optimal image quality at low dose to the patient.
