Subsector A06: BUILDING AND CONSTRUCTION SERVICES

Subsector :	A06	Registration Date :	2013-05-14
Organization :	SIS	Draft Issue Date :	2013-05-13
Country :	Sweden	Latest Date for Comments :	2013-07-13
Project ID :	00825630/0001		Project Established
ICS :	13.060.30		
National Ref :	825630		
Title :	Small wastewater systems for up to 50 PT - Microorganism reduction units		
Scope :	This standard specifies requirements, test methods, marking and evaluation of performance for a microorganism reduction process for small scale domestic wastewater treatment with or without WC. The process can be integrated in a product according to SS-EN 12566-3, -6 and -7, and filterbeds, or as a stand-alone product after such units.

National Ref : 01 8245
Title : Information system in public transport – National centre for real time information
Scope : CISReal – National central system of real time information in public transport is a global entity defined by this standard. Generally there is no centre in the Czech Republic which function is to control multimodal or monomodal transport (except air transport) and to organize public transport.
 There has been no standard to define this issue on national level. Nor technical specification CEN TS 15531 SIRI does not offer the possibility to build up a national information centre so this standard is unique European interoperable solution taking into account national specifics and the state of the art of information systems in public transport.
 This standard defines minimum requirements on the compatibility of real time information systems in public transport in the Czech Republic.
 This standard has been created especially for the following reasons:

1. It defines minimum requirements on operation of National central system of real time information in public transport (CISReal);
2. It contains the recommendations for equipment and functionality of real time information system (ISR);
3. It unifies the requirements on ISR of different carriers and at the same time provides guidance for procedure when designing system and its technical requirements which is important mainly for appliances for financial subventions to build-up such systems and technical requirements definition for public tenders;
4. It improves the possibilities to gain non-fragmented and national scale data in real time of PT vehicles providing a transport services among various regions;
5. It enables basic cooperation on European solution defined by CEN TS 15531 (SIRI) specifying interfaces and communication among the servers;
6. It is the basis for designing a distribution system for mutual communication of servers of local and integrated transport providers;
7. It is to profit from the existing National system of timetables (CIS JŘ) which contains the

Scope : necessary set of static data (planned data).

Title : Standard Test Method for Distillation of Petroleum Products at Atmospheric Pressure

Scope : This standard specifies test method that covers the atmospheric distillation of petroleum products using a laboratory batch distillation unit to determine quantitatively the boiling range characteristics of such products as light and middle distillates, automotive spark-ignition engine fuels with or without oxygenates, aviation gasolines, aviation turbine fuels, diesel fuels, biodiesel blends up to 20 %, marine fuels, special petroleum spirits, naphthas, white spirits, kerosines, and Grades 1 and 2 burner fuels. The test method is designed for the analysis of distillate fuels; it is not applicable to products containing appreciable quantities of residual material. This test method covers both manual and automated instruments.

National Ref : ÖNORM B 8115-2
Title : Sound insulation and room acoustics in building construction - Part 2: Requirements for sound insulation - Basics
Scope : The present Austrian Standard shall be applied to buildings and parts thereof which are intended for longer residence of humans or the use of which allows for rest. It covers particularly residential buildings, residential homes, office buildings, accommodation facilities, schools, kindergartens, hospitals, etc. This ÖNORM provides basic principles and methodology for the determination of the noise protection level. This ÖNORM does not deal with the protection against the outwards noise emitted by the building.

Title : Water - Hydrobiology - Phytoplankton
Scope : In ecological studies, the (relative) density of different kinds and/or groups of plankton is important. During testing two problems occur: 1. taking representative and quantitative samples; 2. numerical evaluation of a large amount of small organisms in these samples. This clarifies the backgrounds of the determination of the density, biovolume and size structure of zooplankton in surface water samples. The described method is suitable for the determination of the composition of Cladocera, Copepoda and Rotifera.

Title :	Carbon footprint of products -- Requirements and guidelines for quantification and communication (ISO/TS 14067:2013)
Scope :	This International Standard specifies principles, requirements and guidelines for the quantification and communication of the carbon footprint of a product (CFP), based on International Standards on life cycle assessment (ISO 14040 and ISO 14044) and on environmental labels and declarations (ISO 14020, ISO 14024, ISO 14025). Requirements and guidelines for the quantification and communication of a partial carbon footprint of a product (partial CFP) are also provided. This International Standard is applicable to CFP studies and different options for CFP communication based on the results of such studies. Where the results of a CFP study are reported according to this International Standard, procedures are provided to support both transparency and credibility and also to allow for informed choices. This International Standard also provides for the development of CFP-product category rules (CFP-PCR), or the adoption of product category rules (PCR) that have been developed in accordance with ISO 14025 and that are consistent with this International Standard. This International Standard addresses only one impact category, climate change. Offsetting is outside of the scope of this International Standard.
