Title : Laser - Radiation protection requirements regarding the production of light-effects by means of laser radiation in the presence of an audience or during the presentation of laser equipment
Scope : This ÖNORM applies to laser equipment for demonstration purposes, display purposes and shows according to ÖVE/ÖNORM EN 60825-1. Distinction is made between applications where light effects are generated in front of an audience for advertisement, entertainment, ostentation or artwork by laser radiation - called laser shows. This ÖNORM applies also if laser, laser systems or laser equipment are shown to the audience for intended use, regardless of the emission in visible spectral range or outside. Laser equipments of class 1 and class 2 are exempted because they are deemed to be safe and no specific safety measures are necessary.

Title :	Laser safety officer - Part 1: Responsibilities and competences (Amendment)		
Scope :	This ÖNORM complements the provisions on laser safety presented in ÖVE/ÖNORM EN 60825 (all parts) by determining the procedures for preventive measures and for managing laser accidents and by defining the competence of those, who are working with laser equipment and responsible for laser safety, especially of the laser safety officer. The recommendations provided by CLC/TR 50448 are considered. This ÖNORM supports organizations operating laser equipments by providing an organizational structure for the implementation and maintenance of effective monitoring procedures stipulated eg in ÖVE/ÖNORM EN 60825-1. Furthermore it has to be ensured, that persons using, or testing laser equipment and are responsible for laser safety have the necessary know-how, understanding and opportunity to perform their task without exposing themselves or other to unnecessary health risks. This ÖNORM determines the responsibility of the employer in respect to laser safety, set up a system of safety measures to fulfill the requirements on organizations using laser equipment and defines the minimum requirements on the qualification.

National Ref :
Title : Furniture components and production defects. Terms and definitions
Scope : 1.1. The standard provides the terms and definitions of basic kinds of furniture, components of furniture, defects of furniture. The terms set out in this standard are mandatory for all types of documents and literature belonging to the domain of standardization activities.
1.2. For each concept standardized term is approved.
1.3. The equivalents for German (de), English (en) French (fr) language are supplied to the term. In the end of standard alphabetical arrows of Lithuanian, German, English, French terms are enclosed.

Title : Bitumen and bituminous binders. Framework for specifying anionic bituminous emulsions

Scope : This national standard specifies the requirements of the performance of different types of anionic bituminous emulsions which are suitable for use in the construction and maintenance of roads, pavements of airports and other paved areas. It applies to emulsions of bitumen, or cut back bitumen and to emulsions of polymer modified bitumen, or of polymer-modified cut back bitumen, which also includes latex modified bituminous emulsions. The structure to specify the anionic bituminous emulsions of this national standard provides a basis for quality between supplier and customer agreements.

Title : Air purity protection – Determination of bromoethene in workplaces gas chromatography
Scope : This standard gives a method for the determination of the content of bromoethene (CAS: 593-60-2) in workplace air by gas chromatography. The method is applicable during control of the hygienic-sanitary conditions. The lowest concentration of bromoethene content which can be determined by the method in the sampling and determination conditions specified in the standard is 0,008 mg/m3

ICS : 13.080.10

National Ref : ÖNORM L 1086-1

Title : Chemical analyses of soils - Determination of exchangeable cations and of effective cation exchange capacity (CECeff) by extraction with bariumchloride solution

Scope : This standard describes a method for the determination of exchangeable cations and effective cation exchange capacity of soils and the humus layer by extraction with barium chloride solution. The barium chloride solution is unbuffered, so the extraction is carried out at a pH value which is determined primarily by the soil (effective exchange capacity).
