## Monthly Notifications Register

Notifications registered at CCMC from 2013-09-01 to 2013-09-30

Sector A : SERVICES

Register issued on : 2013-10-07

**Subsector A06: BUILDING AND CONSTRUCTION SERVICES**

---

**Subsector :** A06 **Registration Date :** 2013-09-04  
**Organization :** SIS **Draft Issue Date :** 2013-09-03  
**Country :** Sweden **Latest Date for Comments :** 2013-11-03  
**Project ID :** 00991000/0001 **Project Established**  
**ICS :** 03.080.30  
**National Ref :** 991000  
**Title :** Craft services  
**Scope :** The scope of the standard is to increase customer satisfaction among consumers when ordering, buying, executing and finalizing the delivery of craft services and that the number of consumer complaints related to craft services will be reduced.

**Relatedness :**

**National :** New

**Subsector A99: UNDETERMINED**

---

**Subsector :** A99 **Registration Date :** 2013-09-20  
**Organization :** UNI  
**Country :** Italy  
**Project ID :** 08000130/0001 **Project Established**  
**ICS :** 03.040  
**National Ref :** U08000130  
**Title :** Non-regulated professions - Professional physicist - Knowledge, skill and competence requirements  
**Scope :** This standard specifies:
 

- 1) the profession of professional physician/physicist and related requirements;
- 2) the levels of education, training and continual professional development required for the profession;
- 3) the professional acknowledgment and a precise placement of the professional physicist among non-regulated professions;
- 4) information to the clients for a proper assessment of the professional service;
- 5) information to the clients on the attestation of the professional physicist, including the applicable ethical and deontological aspects;
- 6) guidelines for the assessment of learning outcomes for the single professional physicist to achieve the relevant qualification.

**ICS :** 13.340.99  
**National Ref :** U5002B930  
**Title :** Personal protective equipment against falls from a height - Personal fall protection systems - Guide for selection and use

**Scope :**

This standard is intended to provide the basis for the selection and use of personal equipment for protection against falls. They include:

- restraint systems;
- work positioning systems;
- rope access systems;
- fall arrest systems;
- rescue systems.

The standard provides a methodology for risk assessment in work at height that can be used for the drafting of the document referred to in articles 17 and 28 of DLgs 81/08 and the subsequent identification of measures of prevention and protection, collective protection devices and personal protective equipment, as required by the legislation in force.

The content of this standard does not exempt from the need for comparison between the information given with the real conditions and protection needs of each specific work environment.

The task of protecting from other risks, other than those contained herein, shall be subject to further evaluation.

This standard is not intended to treat rope access systems, rescue systems and permanent

---

---

**Scope :** anchor systems.

**Relatedness :**

---

**Subsector :** S04 **Registration Date :** 2013-09-20  
**Organization :** UNI  
**Country :** Italy  
**Project ID :** 5002C120/0001 **Project Established**  
**ICS :** 13.340.60  
**National Ref :** U5002C120  
**Title :** Anchor devices intended for permanent installation - Requirements and test methods  
**Scope :** This standard specifies requirements for performance and associated test methods for anchor devices which are intended to be permanently installed into the structure. These devices incorporate stationary or travelling (mobile) anchor points designed for the attachment of components of a personal fall protection system in accordance with UNI EN 363.  
This standard also gives requirements for marking and instructions for use, and guidance on installation. It is fundamental to note that, although requirements and test methods are specified for anchor devices intended to be installed onto specifically simulated structures, the compliance to this standard does not replace the verification of the anchor system installed onto or into the particular structure.  
This standard is not applicable to:

- temporary, removable and transportable anchor devices which are the subject of the EN 795 or the TS 16415;
- equipment designed to conform to EN 516 or EN 517;
- elements or parts of structures which were installed for use other than as anchor points or anchor devices, e.g. beams, girders, etc.

**Title :** Water quality - Biological analysis - Determination of abioseston

**Scope :** This Technical Standard specifies a method for the determination of abioseston. This determination is used for assessment of self-cleaning processes in watercourses, for assessment of effects of water reservoirs on watercourses as well as for assessment of water treatment and waste water treatment processes. Identification of abioseston particles enables to determine an origin of source of contamination.

**Title :** Water quality. Water composition for industrials cooling circuits  
**Scope :** This Technical Standard is applicable to control of chemical regime of industrial cooling circuits. This Standard recommends the parameters of cooling water in various types of cooling circuits and coolers. It specifies the recommended parameters of composition of water, which is in contact with pipeline, water chambers and other construction elements of cooling circuits. Additives in cooling water are recommended with respect to corrosion of construction elements and formation of deposits.

**ICS :** 43.100  
**National Ref :** prNP 4521  
**Title :** Passengers Transports Accessibility  
**Scope :** The present project regulation has as main goal the specification of factors, definitions and information to be considered when a certifying entity assess a Public Transport Network or part of it, including its fleet and support infrastructures, as requested by the companies/entities related to this universe. This certification will be about general accessibility conditions and, on the care companies have on maintaining those conditions for people with reduced mobility (PRM). This project regulation pretends to provide a service that meets the legal and regulatory requirements for accessibility, applied to the use of passengers transport. This project regulation of accessibility for passengers transport will be developed based on 4 diagnostic areas and according to the following matrix: a) Vehicles, b) Support infrastructures, c) Information/Communication, d) Control/Maintenance. It applies to all the companies of public transportation which have as main activity the service of passenger's transport, when provided as defined by NP EN 13816:2003
